- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-30, drawn to depth measurement method and apparatus, classified in class 382, subclass 103.
 - II. Claims 31-48, drawn to image generation method and apparatus, classified in class 382, subclass 154.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as generating an image by combining the two images, and invention I, has separate utility of finding the depth information. See MPEP § 806.05(d).
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 4. A telephone call was made to contact the attorney of the applicant on 8/12/2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
